

2-day Online Training Essentials of Project Management 25-26 November, 2021

Course Concept:

A project is a temporary endeavor undertaken to create a unique product, service or result. Every project is unique with specific goals and objectives which have to be realised on-time, within the given budget. A team of people drawn from various backgrounds have to integrate various tools and techniques to achieve the set goals. Hence project management would be the application of knowledge, skills, tools, and techniques to project activities to meet the project requirements and achieve the goal.

“Begin with the end in mind” and “Failing to plan is planning to fail” are two famous quotes from the great management scientist - Stephen Covey, which is very apt for those involved in development interventions. Planning the result of a project right at the initiation and working towards achieving the same will certainly ensure that resources are put to optimum use and beneficiaries receive the benefits that are committed to them within the project. This is also the basic principle of RBM, which is primarily a corporate or business tool which is widely been put into use in development initiatives as well to monitor outcome and impact of projects.

Course Outline:

- Among others this programme would take up for discussion the 5 phases of *Project Initiation, Project Planning, Project Execution, Project Performance/Monitoring and Project Closure* .
- Management elements such as Integration, Scope, and Time, Cost, Quality, Procurement, People, Communication, Risk and Stakeholder management would be part of the discussion during this online programme.
- Using RBM as a tool for managing and monitoring projects would also be taken up for the understanding of the participants.

Who will benefit from this course?

Project Managers on the job as well as aspiring managers who wish to be professionally qualified to take up the challenging task of project management could be part of this training workshop

The Course Leader:

Dr. Tom Jose has nearly 3 decades of experience in working with development projects both at implementation as well as management level. He has the experience of guiding hundreds of project managers through similar workshops over the past several years.
